

VIPRE Prime Installation and Optimization Services

VIPRE Prime Installation and Optimization Services provide up to three hours of dedicated remote VIPRE endpoint security installation and optimization support (including upgrades and add-ons). VIPRE Support Engineers will assist throughout each step of the installation process, provide best-practice guidance and assist with optimizing VIPRE for your environment.

Our VIPRE Support Engineers will remotely access your environments and guide you through the installation of your VIPRE for Business product. We will be with you through the installation process and answer any questions you have along the way. When complete, you will have the best endpoint security solution available protecting all of your valuable assets.

Services include:

- » VIPRE Central Control Console installation
- » Removal of current anti-malware solution
- » Deployment of VIPRE protection agents on your devices
- » Walk through of Policy setup
- » Walk through of Whitelisting
- » Review of Roaming Agent Cloud Protection
- » MDM components
- » Walk through of Reporting
- » Walk through of Patch Management & Device Control (where applicable)**
- » Assess installation for Optimal Configuration and Policy settings for best performance

Making the switch and upgrading has never been easier with VIPRE Professional Services. Contact our VIPRE team today for additional information and pricing.

***Patch Management available with VIPRE Business Premium. Patch Management and Device Control available with VIPRE Endpoint Security.*

100% Block Rate Zero False Positives

VIPRE offers top-rated endpoint security, consistently earning top marks from leading antivirus testing authorities like AV-Test, AV-Comparatives and more.
